Curious and driven tech enthusiast who loves stepping out of comfort zones, exploring new trends, and solving problems with modern, practical solutions—while staying grounded in strong foundational knowledge.

Experience

Cloud Engineer, Strobes Co – Hyderabad, Telangana Nov 2025 – Present

- Architected and implemented end-to-end DevSecOps CI/CD pipelines integrating automated build, testing, security scanning, and deployment gates, ensuring only validated, secure, and production-ready code was released.
- Designed and deployed a self-hosted Sentry monitoring platform for real-time error tracking and proactive issue detection, enabling faster incident response and improving production reliability.
- Managed and maintained AWS infrastructure, including ECS, EC2, ECR, RDS, ElastiCache, OpenSearch, and Amazon MQ.
- Monitored system performance and optimized cloud resources to improve scalability, availability, and cost efficiency.

Devops Engineer, Rubico IT – Haridwar, Uttarakhand Mar 2024 – Nov 2025

- Automated CI/CD pipelines using GitHub Actions and Gitea for 50+ projects, reducing manual deployment errors by 90% and accelerating deployment cycles by 40%.
- Managed and maintained cloud infrastructure for multiple clients, provisioning and monitoring AWS services including EC2, S3, RDS, SES, CloudWatch, Elastic Beanstalk, IAM, VPC, ECR, and ECS to ensure high availability, scalability, and efficient resource utilization.

Projects

SSH Credentials Manager github

- Built a local SSH credential manager with CLI and terminal dashboard interfaces to organize server connections and SSH key mappings, keeping credential data on the user's system without a cloud storage service.
- Added searchable server profiles, key selection, and export/import for backup and migration between machines, with Docker and standalone Linux support.

Swingly github

- Built customizable pendulum-style website characters and a Python asset pipeline supporting image generation through Codex or the OpenAI API, transparent PNG imports, and WebP publishing with structured manifests.

Infuse AI github

- Built a RAG application that lets users upload PDF and TXT files and ask questions using an LLM with relevant document context.
- Developed the application using Node.js, React with Vite, Docker, and DynamoDB.

Slack Template GitHub Action GitHub Marketplace

- Designed a GitHub Action that enhanced Slack CI/CD alerts using Slack Block Kit, improving message clarity and reducing developer response time by 30%.
- Boosted CI/CD communication effectiveness by 50% through structured Slack messages with YAML-based customization, improving developer response time.

Skills

Languages: Bash, Python, Terraform

Technologies: Docker, GitHub, AWS, Cloudflare, Linux

Education

Graphic Era Hill University, Bachelor of Technology in Computer Science and Engineering 2020-2024

- CGPA: 8.67/10.0
